

Software Engineering Project

Project:

Learning Management System

Group Members:

- Tuba (BSAI51S25R017)
- Ayesha Hassan (BSAI51S25R020)
- Emaan Fatima (BSAI51S25R042)

Processing

- ◆ At first the user login or register on the system.
- ◆ If the user is new, they will register by creating an account.
- ◆ If the user has already an account, they will login.
- ◆ The system verifies user's name, password and ID and so on..
- ◆ After verification, the user gains access to the main page where they can view class wise notes, past papers, Guess papers and pairing scheme.
- ◆ Teacher create notes, assignment and quizzes, upload recorded lectures, slides and other study material.
- ◆ Student attempt them online and then teacher give marks and feedback.
- ◆ At a time multiple students and teachers visit and do their work on website.
- ◆ System automatically keep the record of student performance and attendance.
